

Cost and time studies using the BeamRider laser guided line marker - Council

Study 1

Mark out a pitch from new – Study revealed an average of 3 hours per pitch to complete this task using traditional methods

Traditional method 3 hours per pitch 2 man operation @ £12.00 each per hour Total of £72.00 per pitch Total for 25 pitches = £1800.00	BeamRider 1 hour per pitch 2 man operation @ £12.00 each per hour Total of £24.00 per pitch Total for 25 pitches = £600.00
--	---

Saving of £1200.00

Study 2

Initial mark a high volume of pitches prior to new season

Traditional method 3 hours per pitch 2 man operation @ £12.00 each per hour Total of £72.00 per pitch Total for 100 pitches = £18,000.00	BeamRider 1 hour per pitch 2 man operation @ £12.00 each per hour Total of £24.00 per pitch Total for 100 pitches = £6000.00
---	---

Saving of £12,000.00 every year

Further examples of benefits

- *Perfect, straight and uniform lines*
- *Allows a high quality and standard of workmanship to be achieved week after week*
- *Easy to operate – anyone can use the system*
- *Self correcting and maintenance free software – Operators cannot make mistakes in line straightness and quality, deviations are automatically detected*
- *Can be used periodically to quickly and efficiently straighten and correct previous pitch markings, saving time and money*
- *Environmentally friendly method to mark out pitches*
- *Operator friendly and self correcting software – you cannot produce a wobbly line*
- *Easily cleaned and maintained*
- *Multi-tasking – mark out playgrounds, tennis, netball, etc accurately and easily*
- *Guaranteed client/customer satisfaction*
- *Efficient and easy way to produce high quality work*
